SKILLS

- MCP (Model Context Protocol)
- AI Agents
- React Native
- TypeScript
- JavaScript
- React.js
- Redux
- Swift
- Node.js
- SDK & API Integration
- CI/CD
- Digital Wallet Integration
- Micro Frontends
- Docker
- Tailwind CSS
- Web Accessibility
- Git
- Express.js
- Row Level Security
- Supabase
- PostgreSQL

PROFILE

Front-End / React Native Developer with 4+ years of experience building scalable mobile and web applications for fintech and digital banking platforms. Skilled in React Native, React.js, TypeScript, SDK/API integrations, CI/CD, secure payment flows, and AI-assisted product prototyping. Recognized for leading payment platforms, digital wallet integrations, Apple Watch/Vision Pro applications, and micro-front-end architecture from concept to delivery.

WORK EXPERIENCE

Front-End Engineer

Rakbank, Dubai / January 2022 - Current

- Built and maintained scalable React Native and React.js applications for digital banking platforms, delivering secure mobile and web experiences for banking customers.
- Served as Product Owner and Lead Developer for a Vision Pro spatial computing application, delivering immersive customer experiences.
- Led frontend development of an Easy Payment Plan platform, enabling installment-based payment flows across digital banking channels.
- Engineered a secure 3D Secure payment gateway alternative focused on authentication, security, performance, and user experience.
- Led Apple Watch and Android Wallet integrations to enhance mobile banking, wallet, and digital payment experiences.
- Integrated third-party SDKs and APIs including payment gateways, biometric authentication, analytics, notifications, and security tools.
- Architected bilingual application support, push notification flows, and customer engagement features from scratch.
- Built CI/CD pipelines to automate testing, deployment, and release workflows for mobile and web applications.
- Developed a micro-front-end architecture to improve scalability, modularity, and maintainability across banking products.
- Created Copilot custom instructions and reusable AI agent workflows to support development, debugging, documentation, and engineering process automation.
- Built and used MCP-based integrations to connect AI agents with tools, documentation, APIs, and internal workflows, improving developer productivity and access to project context.
- Developed and maintained unit tests using Jest to improve application reliability and prevent regressions.

Microservices

REST APIs

RBAC (Role-Based Access
Control)

3D Secure

ACHIEVEMENTS

Received Performance Award
at RAKBANK for leading the
development of a Vision Pro
application from scratch

Received Performance Award
at RAKBANK for delivering the
Easy Payment Plan platform.

PERSONAL PROJECT

SaaS Web Platform

Tech Stack: React.js, Node.js, Express.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS, REST APIs, GitHub

- Designed and developed a full-stack SaaS web application using React.js, Node.js, Express.js, Supabase, and PostgreSQL.
- Built a microservices-based backend to separate authentication, business logic, and API services.
- Implemented secure authentication, RBAC, and session management using Supabase Auth.
- Designed a PostgreSQL database with normalized schemas and Row Level Security (RLS).
- Developed RESTful APIs and integrated real-time database and storage services through Supabase.
- Built an admin dashboard with subscription billing, analytics, and user management.
- Added AI-powered features using LLM APIs and automated email workflows.
- Containerized services with Docker and implemented CI/CD for automated deployments.

EDUCATION

B.Sc. Information Technology

Middlesex University, Dubai / 2021 - 2023

- Graduated with First Class Honours.
- Developed an AI-based sign language recognition project that converted hand gestures into words using Python, Flask, and HTML.
